PROFESSIONAL EXPERIENCE

Max Planck Institute for Demographic Research	Rostock, Germany
<i>Social Data Science Researcher</i>	06/2024 - 08/2024
Building statistical models to estimate age-specific mortality at the national and subnational levels in a data scarce context.	
RegLab @ Stanford Law School	Stanford, CA
<i>Graduate Fellow</i>	06/2023 - 08/2023
Designed statistical sampling techniques to estimate racial disparity when data is scarce, and established performance guarantees with mathematical proofs. Built simulations and estimated the health disparity in a dataset containing ~7M Americans' healthcare records.	
Carnegie Mellon University & Data Science for Social Good Foundation	Pittsburgh, PA
<i>Data Science Fellow</i>	05/2022 - 08/2022
Built a machine learning system to improve the routing of the 988 Suicide & Crisis Lifeline which serves 2,000,000+ callers per year. Obtained preliminary results that showed the new system could help ~20,000 additional callers each year.	

University of Chicago Consortium on School Research

Hyde Park, IL

Research Intern

03/2022 - 05/2022

Conducted clustering analysis on Chicago Public Schools data to predict students' graduation rate.

HomeRiser, Inc

Remote

Co-founder, Head of Data Science

01/2021 - 10/2021

Co-founded a real estate technology start-up to provide more flexible and affordable ways to finance people's home ownership. Developed a financial model in Python that simulated cash flow and generated a detailed profit and loss statement.

University of Maryland | REU - Combinatorics and Algorithms for Real Problems

College Park, MD

Undergraduate Researcher

05/2019 - 08/2019

Developed a machine learning model for advance healthcare directives. Deployed active learning algorithms to dynamically select survey questions based on patients' previous responses. Built a website to collect data. Coauthored a paper, which was accepted to the *Explainable AI in Healthcare and Medicine*.

Oberlin College Computer Science Department

Oberlin, OH

Undergraduate Researcher

06/2018 - 08/2018

Analyzed a repeated pricing game between a buyer and seller in the presence of privacy and the absence of commitment power. Conducted numerical experiments and solved for equilibrium in the game. Formalized results about the effect of privacy in our repeated sales setting.
